

Tran Ho Hoang Vu

Backend Developer Fresher

☎ +84 858 041 045 | ✉ hoangvu2k4cmg@gmail.com | 🔗 LinkedIn | 🐙 GitHub | 📁 Portfolio | 📍 Ho Chi Minh City

OBJECTIVE

Computer Science graduate from Ton Duc Thang University with hands-on backend development experience from a software engineering internship and full-stack projects. Experienced in building RESTful APIs, backend business logic, database-driven applications, authentication, and system integrations using Node.js, Express.js, Laravel, PostgreSQL, MySQL, and MongoDB. Focused on backend development, system automation, and building reliable software solutions.

EDUCATION

Ton Duc Thang University

Bachelor of Computer Science

GPA: 8.04/10.00

Ho Chi Minh City, Viet Nam

Sep 2022 – Jun 2026

SKILLS

Backend: Node.js, Express.js, PHP, Laravel, RESTful APIs, Authentication & Authorization

Databases: PostgreSQL, MySQL, SQL Server, MongoDB, SQL, Database Design

Integration & Automation: Jira REST API, JQL, OpenClaw, Atlassian Document Format (ADF)

DevOps & Tools: Docker, Docker Compose, Nginx, Git, GitHub, Postman, Swagger

Programming Languages: JavaScript, TypeScript, Python, Java, C, C#

Frontend: React, Tailwind CSS, Bootstrap, HTML, CSS

EXPERIENCE

TMA Solutions

Backend Developer Intern

Ho Chi Minh City, Viet Nam

Mar 2026 – Jun 2026

- Designed and implemented components of a modular backend automation system using OpenClaw to connect Discord and Jira, defining workflows for input handling, validation, and data normalization.
- Built automation workflows to validate daily work reports, extract structured information, update summary data, and generate DEV/QA tasks from BA requirements.
- Integrated the Jira REST API and JQL to perform issue operations and dynamically query open, overdue, and stale tasks.
- Implemented command parsing to convert Discord messages into actionable intents for task creation, status transitions, and issue queries, enabling automated Jira task management.
- Worked on API request and error-handling standards, including JSON and Atlassian Document Format (ADF) request formatting and response validation.

Ton Duc Thang University

Exam Invigilator (Part-time)

Ho Chi Minh City, Viet Nam

Sep 2024 – Sep 2026

- Invigilated on-site examinations, ensured compliance with exam regulations, and maintained a fair testing environment.
- Verified student identities, managed attendance and exam materials, and reported incidents clearly to academic staff.

PROJECTS

SchoolOps – School Operations Management System | GitHub

Sep 2026 – Present

Role: Full-stack Developer · Personal Project

- Developed a full-stack school management platform using Next.js 16, React 19, and TypeScript for classes, students, attendance, and teacher workflows.
- Implemented dynamic role-based access control with separate administrative and teacher workflows and permissions.
- Built interactive classroom seating and timetable management with student assignment and scheduling conflict resolution.

BookingCare – Healthcare Appointment Booking Platform | GitHub

Aug 2026 – Present

Role: Full-stack Developer · Personal Project

- Built a full-stack healthcare appointment platform using Next.js 15, TypeScript, Supabase, and PostgreSQL for patient, doctor, and administrator workflows.
- Implemented business logic for doctor search, schedule management, appointment booking, cancellation, reviews, and notifications.
- Integrated authentication, SSR session handling, Row Level Security (RLS), and RBAC, with concurrency-safe booking using PostgreSQL constraints and atomic operations.

Role: Full-stack Developer · Personal Project

- Built a full-stack LMS using React, Node.js/Express, and PostgreSQL with a modular MVC backend and RESTful APIs for courses, enrollments, and orders.
- Implemented JWT authentication, RBAC, request validation, security middleware, and rate limiting for protected API workflows and role-specific operations.
- Optimized PostgreSQL queries with strategic indexing and implemented automated integration tests to improve backend performance and reliability.

E-Commerce Platform – Full-stack Web Application | GitHub

Sep 2025 – Dec 2025

Role: Frontend Developer · TDTU Academic Project

- Developed a full-stack e-commerce platform using React, Node.js/Express, and MongoDB, implementing product, cart, order, payment, and administration workflows.
- Integrated JWT authentication, Google OAuth, Zod validation, email services, VNPAY payment processing, and Socket.IO for real-time application updates.
- Containerized the application with Docker Compose and configured Nginx as a reverse proxy and load balancer, with Swagger API documentation and GitHub Actions CI/CD.

CERTIFICATES

Agile Development & Scrum Framework Course 2024 (Techbase Viet Nam)

Oct 2024

Issued: 25/10/2024 at Ton Duc Thang University

Aptis ESOL (British Council)

Apr 2024

Credential ID: ESOL~0155613 | Credential URL
