

Tran Ho Hoang Vu

Frontend Developer Fresher

☎ +84 858 041 045 | ✉ hoangvu2k4cmg@gmail.com | 🔗 LinkedIn | 🐙 GitHub | 📁 Portfolio | 📍 Ho Chi Minh City

OBJECTIVE

Computer Science graduate from Ton Duc Thang University with hands-on experience building responsive web applications using React, Next.js, and TypeScript through personal and academic projects. Experienced in developing reusable UI components, multi-role interfaces, authentication flows, interactive user experiences, and API-integrated applications. Familiar with frontend-backend data flows, with a focus on usability, responsive design, and clean implementation.

EDUCATION

Ton Duc Thang University

Bachelor of Computer Science

GPA: 8.04/10.00

Ho Chi Minh City, Viet Nam

Sep 2022 – Jun 2026

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Bootstrap, HTML5, CSS3, Responsive Design

UI Development: Component-driven Development, React Hooks, Context API, Form Handling, Authentication Flows, Role-based UI

Backend & APIs: Node.js, Express.js, RESTful APIs, JWT Authentication, PostgreSQL, MongoDB

Tools: Git, GitHub, Postman, Swagger, Docker, Vercel, Figma (basic)

Programming Languages: TypeScript, JavaScript, Python, Java, C, C#

EXPERIENCE

TMA Solutions

Software Engineering Intern

Ho Chi Minh City, Viet Nam

Mar 2026 – Jun 2026

- Collaborated in an Agile team to develop automation features connecting Discord and Jira, with a focus on clear user interactions and structured command-based workflows.
- Designed input handling, validation, and data normalization flows to transform user messages into structured actions and provide consistent system feedback.
- Integrated REST APIs and structured response handling for task creation, status queries, and dynamic Jira data retrieval.

Ton Duc Thang University

Exam Invigilator (Part-time)

Ho Chi Minh City, Viet Nam

Sep 2024 – Sep 2026

- Invigilated on-site examinations, verified student identities, managed attendance and exam materials, and maintained compliance with examination procedures.
- Reported incidents and operational issues clearly to academic staff while maintaining an organized and fair examination environment.

PROJECTS

SchoolOps – School Operations Management System | GitHub

Sep 2026 – Present

Role: Full-stack Developer · Personal Project

- Developed a full-stack school management platform using Next.js 16, React 19, and TypeScript for managing classes, students, attendance, and teacher workflows.
- Built an interactive classroom seating grid and timetable interfaces with reusable components and conflict-resolution workflows for daily classroom management.
- Implemented dynamic role-based navigation and views, providing users with context-specific actions and management interfaces across the platform.

BookingCare – Healthcare Appointment Booking Platform | GitHub

Aug 2026 – Present

Role: Full-stack Developer · Personal Project

- Built a responsive healthcare appointment platform using Next.js 15 and TypeScript, with tailored interfaces for patients, doctors, and administrators.
- Designed interactive user flows for doctor discovery, schedule selection, appointment booking/cancellation, reviews, notifications, and role-specific dashboards.
- Developed reusable UI components and integrated Supabase authentication, SSR session handling, and RBAC to deliver consistent multi-role experiences with validation and feedback states.

Role: Full-stack Developer · Personal Project

- Developed a React-based LMS frontend with interfaces for course discovery, course details, enrollment, learning progress, and student/instructor workflows.
- Implemented protected routes and role-based UI rendering with JWT authentication to provide separate experiences for students and instructors.
- Built reusable components and responsive layouts for course lists, detail pages, forms, and order workflows while integrating RESTful APIs.

E-Commerce Platform – Full-stack Web Application | GitHub

Sep 2025 – Dec 2025

Role: Frontend Developer · TDTU Academic Project

- Developed a responsive e-commerce frontend using React, covering product discovery, product details, cart management, checkout, and order history.
- Implemented authentication and form-driven workflows with Google OAuth, JWT, validation, and VNPAY payment integration for a complete shopping flow.
- Integrated Socket.IO for real-time application updates and designed immediate feedback across product, cart, and payment interactions.

CERTIFICATES

Agile Development & Scrum Framework Course 2024 (Techbase Viet Nam)

Oct 2024

Issued: 25/10/2024 at Ton Duc Thang University

Aptis ESOL (British Council)
